## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 8 and 10** are rejected under 35 U.S.C. 102(e) as being anticipated by Takahashi (US Patent number 6,073,856).

Regarding **claim 8**, Takahashi discloses that a data processing apparatus (column 3, lines 55 – column 4, lines 47 and Fig. 2). Takahashi teaches that a casing having a card slot for inserting therein an IC card (10 in Fig. 3) (Fig. 1, 3 and column 4, lines 62 – column 5, lines 67, where teaches a IC card can separates from a main body). Takahashi teaches that an antenna (13 in Fig. 3). Takahashi teaches that a first antenna terminal connected to the antenna (Fig. 1, 3 and column 4, lines 62 – column 5, lines 67, where teaches the antenna of main body terminal connected IC chip) and configured to connect the antenna to second antenna terminal incorporated in the IC card when the IC card is inserted in the slot (Fig. 1, 3 and column 4, lines 26 – column 5, lines 67, where teaches IC card provides with separate antenna coils, and the antenna of main body terminal connected IC chip with cooperated the antenna coil of IC card as the IC card is in the main body slot), wherein the first antenna terminal and the second antenna terminal become connected upon the insertion of the IC card into the slot (Fig. 1, 3 and column 4,

lines 26 – column 5, lines 67, where teaches the antenna terminal of main body terminal connected IC chip with cooperated the antenna terminal of IC card as the IC card is in the main body slot).

Regarding **claim 10**, Takahashi discloses that the antenna is provided on a surface of the casing (Fig. 1, 3 and column 4, lines 26 – column 5, lines 67, where teaches IC card provides with separate antenna coils on a surface of the main body).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claim 9** is rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi in view of Miyake (US Patent number 6,029,982).

Regarding **claim 9**, Takahashi discloses the all the limitation, as discussed in claim 1. However, Takahashi does not specifically disclose the limitation “the antenna is provided in an eject lever to be operated to eject the IC card”. However, Miyake discloses the limitation “the antenna is provided in an eject lever to be operated to eject the IC card” (Fig. 15, 16 and column 11, lines 57 – column 12, lines 60, where teaches the antenna can be inserted and removed from the slot by operating to eject the IC card). It would have been obvious to one having ordinary skill in that art at the time the invention

was made to modify the Takahashi's structure as taught by Miyake, provide the motivation to enhance data adaptability in data processing device.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yokota et al. (US Patent number 5,914,980) discloses Wireless Communication System and Data Storage Medium.

Hayashi et al. (US Patent number 6,608,550) discloses Reader and/or Writer Apparatus, Power Feeding System, and Communication System.
